Starting my career in Sales and Business Development, I quickly realized that behind every growth strategy lies the power of data. Over the past three years, I've not only driven revenue and built strong client relationships, but also developed a passion for uncovering insights through data analysis. This led me to sharpen my skills in Python, Pandas, SQL, Tableau, Excel, and Google Sheets—tools I now use to transform raw data into meaningful stories. With a solid business background and an analytical mindset, I bridge the gap between data and strategy, helping organizations make smarter, data-driven decisions.

Skills

- Programming: Python (Pandas, NumPy, Scikit-learn), SQL (PostgreSQL, MySQL, BigQuery)
- Data Analysis: Data Cleaning, EDA, Statistical Analysis, Feature Engineering
- Visualization: Tableau, Power BI, Matplotlib, Excel, Google Sheets
- Machine Learning: Linear/Logistic Regression, Random Forest, K-Means Clustering
- Business Analytics: Customer Analytics, CLV Prediction, Churn Prediction, RFM Analysis, Cohort Analysis, KPI Reporting
- Tools: Git, GitHub, Jupyter Notebook, VS Code
- Soft Skills: Analytical Thinking, Problem Solving, Communication, Attention to Detail

Data Analytics Education

- Business Intelligence & Data Analyst Program (Non-Degree)** — Pacmann Academy, Jakarta *April 2026 – Present*
- Relevant coursework: EDA, SQL for Data Analysis, Python for Data Analysis (Pandas, NumPy), Data Visualization (Tableau, Matplotlib), Statistics for Business Analytics, Machine Learning Fundamentals, BI & Dashboard Development
- Data Analyst Certificate** ([Link](#))

Projects

- [E-Commerce Customer Segmentation using RFM & K-Means \(2026\)](#) (Python) — Segmented e-commerce customers using Recency, Frequency, and Monetary (RFM) analysis to identify high-value customer segments.
- [Forecasting Export Indonesia with SARIMA \(2026\)](#) (Python) — Developed a SARIMA time series forecasting model to project Indonesia's export volume trends.
- [Retail Store Dashboard \(2025\)](#) (Python, Tableau) — Developed an interactive dashboard to monitor sales performance and retail transaction trends.
- [Customer Churn Analysis \(2025\)](#) (Python, PostgreSQL, Data Studio) — Menganalisis data penjualan kafe untuk mengidentifikasi pola transaksi dan produk terlaris.
- [Population Growth in Indonesia \(2025\)](#) (Tableau) — Visualized population growth trends across Indonesian regions over time using interactive dashboards.

Work Experiences

- MGBedbank - Jakarta**, February 2024 – June 2024 *Sales Executive*
- Managed and developed relationships with B2B travel agent partners through regular visits and calls while conducting sales performance analysis to identify high-contributing accounts and growth opportunities. Designed and maintained reporting dashboards in Excel and Google Sheets, applying data cleaning and trend analysis to monitor booking performance, revenue growth, and client segmentation. Leveraged these insights to implement data-driven sales strategies, achieving a consistent 15% monthly revenue growth from a 1.5 billion base. Collaborated with cross-functional teams to translate business needs into actionable insights, streamlining group reservation processes and improving

long-term client retention.

Mtarget - Jakarta, April 2023 – January 2024 *Business Development*

Consistently achieved monthly targets by conducting a minimum of 10 daily calls and generating over 50 qualified leads per month to support the sales pipeline. Analyzed CRM lead data using Excel to evaluate lead quality and distribution, applying data cleaning and segmentation that uncovered more than 200 un-updated leads in the system. These findings led to improved lead management processes across Sales, Marketing, and SDR teams, resulting in a 20% increase in conversion efficiency. Additionally, entrusted as a trial SDR leader to coordinate team activities, ensure daily target achievement, and maintain lead quality within the pipeline.

Lamudi Indonesia - Jakarta, October 2021 - February 2023 *Client Relationship Officer*

Made a minimum of 10 daily calls to prospective clients to identify housing needs and deliver personalized property recommendations. Successfully achieved a weekly target of 4 client visits to evaluate residential locations and provide tailored advice, strengthening customer trust and engagement. Consistently met a monthly sales target of IDR 1.2 billion by identifying market opportunities and driving property transactions. Additionally, analyzed client inquiries and sales data to map high-demand residential areas, enabling more accurate targeting and improved conversion rates.

Education Level

Sekolah Tinggi Pariwisata - Bogor Graduation Date October 2021

Bachelor's Degree in Hotel Management, GPA 3.8 out of 4.00
